12. Appendix C – Non-Functional Requirements

1. Executive Summary

ASUN Migrations is a web-based platform built to help Australian migration agencies manage clients, visa applications, documentation, billing, and compliance. It supports both **agency operations** and **client self-service**, combining CRM, workflow automation, and compliance tracking into one environment.

The platform will cater to multiple migration agencies under a Software-as-a-Service (SaaS) model. Each agency will have secure, isolated data management while using standardised workflows and templates aligned with the **MARA Code of Conduct** and **Australian Privacy Principles (APPs)**.

Purpose:

This document defines the business, functional, and technical requirements for the ASUN Migrations system. It serves as the master reference for development, testing, training, and stakeholder alignment.

2. Business Objectives

Objective	Description	Success Measure
Client Management Efficiency	Centralise client and case data, reducing duplication and manual input.	80% reduction in redundant data entry.
Operational Automation	Automate repetitive workflows per visa subclass.	90% of matters generated via templates.
Compliance Assurance	Ensure all activity complies with MARA and APPs.	100% of updates auditable and time-stamped.
Client Transparency	Empower clients to track progress and upload documents.	70% client adoption within 3 months.
Financial Integration	Manage billing and payments natively.	90% of invoices paid online via Stripe.
Reporting & Visibility	Provide insights across agencies.	Dashboards for workload, revenue, and expiry alerts.

3. Scope

3.1 In Scope (MVP)

- Authentication with MFA
- Client & Matter Management

- Workflow Automation (visa templates)
- Document Upload & E-Sign
- Client Portal (status, uploads, payments)
- Billing & Payments (Stripe)
- Reporting (pipeline, revenue, SLA breaches)
- Admin (templates, roles, branding, audit logs)

3.2 Out of Scope (Phase 2)

- Employer/Sponsor Portal
- Xero & QuickBooks Sync
- Calendar Integration
- Advanced Automation Rules
- Knowledge Base / SOP Repository
- Multilingual Portal

4. Stakeholders & Roles

Role	Responsibilities
ASUN Admin	Global system management, tenancy setup.
Agency Admin	Configure workflows, manage users.
Registered Migration Agent (RMA)	Manage matters, approve documents, and lodge cases.
Case Officer	Handle assigned matters and tasks.
Finance Officer	Create invoices, track payments.

Client (Portal User)	Upload documents, view status, communicate securely.
----------------------	--

5. Compliance Alignment

ASUN Migrations will operate under Australian regulatory requirements.

5.1 MARA Code of Conduct

- Maintain written records of advice and communications for **7 years**.
- Obtain client consent before acting and retain engagement letters.
- Ensure client access to relevant documents.
- Prevent unauthorised disclosure of client information.

5.2 Australian Privacy Principles (APPs)

- **APP 1:** Transparent management of personal information.
- **APP 6:** Disclosure only for intended purpose.
- **APP 11:** Secure data storage and access control.
- **APP 12–13:** Right to access and correct data.

5.3 Record Retention Policy

- Data retention configurable per agency (default 7 years).
- All deletion or erasure actions logged and authorised.

6. System Overview

6.1 Core Modules

1. **Authentication & Security** – MFA, roles, session tracking.
2. **Dashboard** – Tasks, pipeline, alerts.
3. **Clients** – Profiles, dependants, identifiers, conflicts.
4. **Matters** – Visa applications, stages, checklists.
5. **Lodgements & Decisions** – TRNs, CO requests, outcomes.
6. **Tasks & Workflows** – Templates and dependencies.
7. **Documents & E-signatures** – Upload, verify, sign.
8. **Messaging & Notes** – Secure comms.
9. **Client Portal** – View progress, upload files, pay invoices.
10. **Billing & Payments** – Quotes, invoices, Stripe.
11. **Reports** – Pipeline, deadlines, revenue.
12. **Admin** – Templates, permissions, audit, branding.

6.2 Workflow Summary

graph TD

A[Client Intake] --> B[Matter Creation]

B --> C[Document Upload & Verification]

C --> D[Lodgement & CO Requests]

D --> E[Decision Recording]

E --> F[Billing & Payments]

F --> G[Reporting & Compliance Logs]

7. Functional Requirements (Detailed)

Each module below lists functional behaviour, business rules, integration points, and example screens.

7.1 Authentication & Security

Description: Secure login, MFA, and access control.

Features:

- Login via email/password with optional SSO (Google/Microsoft).
- MFA setup (TOTP app or SMS).
- Role-based permissions.
- Session tracking and remote logout.

Business Rules:

- Account locks after 5 failed attempts (15 min).
- Password policy: min 8 chars, 1 upper, 1 number, 1 symbol.
- Sensitive data encrypted with AES-256.

Example Screen Layout:

[Login Screen]

Email: [_____]

Password: [_____]

[MFA Code: Optional if enabled]

[Sign In] [Forgot Password?]

7.2 Dashboard

Purpose: Provide real-time insights and to-dos.

Widgets:

- My Tasks (Due Today / Overdue / Next 7 Days)
- Visa Expiry Alerts
- Case Officer Requests
- Pipeline by Stage
- Recent Client Messages

Business Rules:

- Refresh data every 10 minutes.
- Alerts triggered by key dates < 30 days away.

Acceptance Criteria:

- User sees only data relevant to their assigned matters.

7.3 Clients Module

Functions:

- Create/edit clients with identifiers (Passport, TRN, HAP ID).
- Add dependants and relationships.
- Upload engagement letter and consent form.
- Record conflict check.

Validation Rules:

- Passport format: 1 letter + 7 digits.
- DOB must be $\leq$ current date.
- Email unique per client.

Compliance:

- Consent required before acting.

- Records retained for 7 years.

Example Screen:

[Client Profile]

Name: John Smith

DOB: 12/04/1990 Nationality: UK

Passport: X1234567

Engagement Letter: [View] [Replace]

Dependants: [Add] [List]

7.4 Matters Module

Purpose: Manage visa applications per client.

Features:

- Create matter by visa subclass (e.g. 482, 186, 485).
- Stages (Initial → Lodgement → Decision).
- Task and checklist generation via template.
- Key dates tracking (medicals, police checks).

Business Rules:

- Each matter linked to one client but can include multiple dependants.
- Checklist dynamically generated by subclass.

Example Layout:

[Matter Overview]

Visa Type: 482 TSS

Stage: Lodged

TRN: ABC1234567

Tasks: [7 open / 15 total]

Key Dates: [View Calendar]

7.5 Documents & E-Sign

Functions:

- Upload, preview, and verify client documents.
- E-sign for engagement letters or statutory declarations.

Integration:

- **DocuSign API** (Primary)
 - Send envelope: POST /envelopes
 - Status callback: POST /webhook/docusign/status
 - Expected: 200 OK on signature complete.

Validation:

- File types: PDF, DOCX, JPG.
- Max size: 25MB per file.
- Virus scan required before verification.

Compliance:

- Verification logged with user ID and timestamp.

7.6 Client Portal

Purpose: Client-facing dashboard for updates and uploads.

Features:

- Secure login linked to client ID.
- View matter stage and progress bar.
- Upload requested documents.
- View invoices and pay online via Stripe.
- Send/receive messages securely.

Interface:

- **Stripe Checkout** (Payment link):
 - POST /checkout/session/create
 - Returns payment_url → redirect client.
- **Email relay:** SendGrid or AWS SES integration for notifications.

Example Layout:

[Client Portal – Matter Summary]

Stage: Awaiting Health Check

Documents Outstanding: 3

Next Step: Upload Medical Certificate

[Upload Document] [View Invoice] [Message Agent]

7.7 Billing & Payments

Features:

- Create and send quotes/invoices.
- Payment via Stripe API.
- Generate PDF receipts.

- Export to CSV.

Business Rules:

- Invoice status auto-updates on payment webhook.
- Tax rate configurable per agency.
- Overdue reminders sent daily after due date.

Interface:

- **Stripe Webhook:** /webhook/stripe/payment → status: succeeded/failed.

7.8 Reporting

Reports:

- Pipeline by visa stage.
- Work-in-progress & overdue tasks.
- Revenue by agent or subclass.

Exports: CSV, XLSX.

Access Control:

- Admins and RMAs only.

8. Data Model (Overview)

erDiagram

User ||--o{ Session : has

User ||--o{ Task : assigned

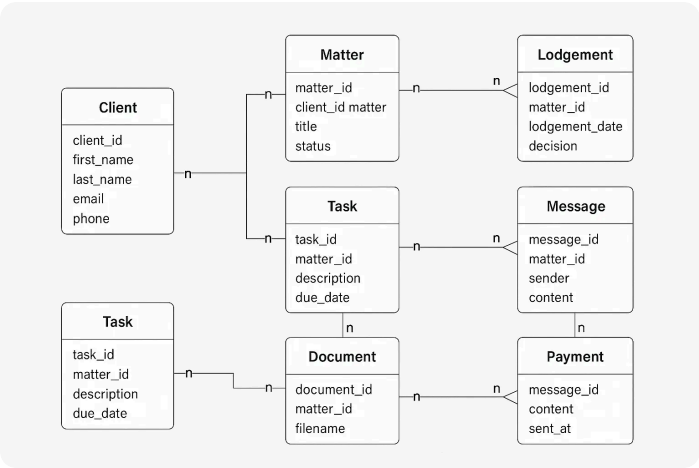

Client ||--o{ Matter : owns

Matter ||--o{ Task : includes

Matter ||--o{ Document : stores

Document ||--o{ SignatureEnvelope : signs

Matter ||--o{ Invoice : bills

9. Interface Specifications

Integration	Type	Purpose	Endpoint / Method	Response
Stripe	REST	Payments & receipts	/checkout/session/create	Payment URL
DocuSign	REST	E-signatures	/envelopes	Envelope ID
AWS SES / SendGrid	SMTP / API	Email notifications	/send	200 OK
VEVO API (optional)	REST	Visa verification	/check	JSON visa status

10. Appendix A – Data Dictionary

Table	Field	Type	Validation	Notes
User	id	UUID	PK	Auto-generated
	email	String	Unique, valid email	
	role	Enum	Admin/RMA/Finance	
Client	id	UUID	PK	
	passport_no	String	Masked, encrypted	
	email	String	Unique	
Matter	id	UUID	PK	
	visa_subclass	String	Required	e.g., 482, 186
	stage	Enum	Draft/Lodged/Granted	
Invoice	number	String	Unique	Format: INV-YYYY-XXXX
Payment	amount	Decimal	>0	Stripe sync

11. Appendix B – Example Workflow (Visa Application)

graph TD

B --> C[Engagement Letter Signed]

C --> D[Create Matter from Template]

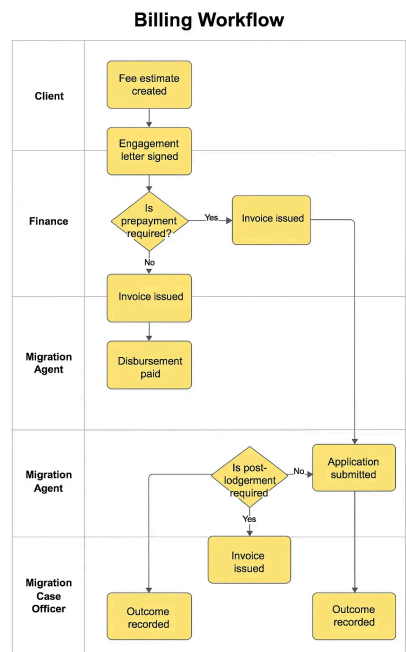

D --> E[Upload Documents]

E --> F[Verify and Lodge Application]

F --> G[Decision Logged]

G --> H[Invoice and Payment]

H --> I[Archive and Retention (7 years)]

12. Appendix C – Non-Functional Requirements

Category	Requirement	Target
Security	AES-256 encryption at rest	100% sensitive data
Privacy	APP compliance	Mandatory

Performance	< 2.5s load time	95th percentile
Uptime	99.9% availability	Monthly
Accessibility	WCAG 2.2 AA	Required
Scalability	Multi-tenant ready	Yes

13. **Appendix D – Use Cases**

7.1 **Authentication & Security — Use Cases**

UC-7.1-1 Sign in with MFA

Actors: User (staff), System

Preconditions: Account exists; MFA may be enforced

Trigger: User submits email and password

Main Flow:

- 1. Validate email/password.
- 2. If invalid → increment failure counter; return generic error; STOP.
- 3. If account locked (≥5 failures/15m) → return lock message; STOP.
- 4. If MFA required → prompt for OTP.
- 5. Validate OTP (30–60s window).
- 6. If OTP invalid/expired → increment OTP failures; allow resend; lock after 5; STOP on lock.
- 7. Create session (token, expiry, device, IP).
- 8. Update last_login_at.
- 9. Write AuditEvent(login_success).
- 10. Redirect to Dashboard. **Postconditions:** Valid session active.

UC-7.1-2 Password reset

Actors: User, System

Preconditions: Email verified

Trigger: User clicks "Forgot password"

Main Flow:

1. Generate one-time token (TTL 15m, single-use).
2. Email reset link with token.
3. User opens link; submit new password.
4. Validate policy (len/complexity/not reused).
5. Hash+store new password.
6. Revoke all other sessions + tokens.
7. Write AuditEvent(password_reset).
8. Confirm success.

UC-7.1-3 Enrol MFA (TOTP/SMS)

Actors: User, System

Main Flow:

1. User chooses TOTP or SMS.
2. Generate shared secret (TOTP) or send SMS code.
3. Display QR (TOTP) or wait for code entry.
4. Validate code.
5. Set mfa_enabled=true; generate recovery codes.
6. Store masked phone (if SMS) / secret (encrypted).
7. Write audit event.

UC-7.1-4 Manage sessions

Actors: User

Main Flow:

1. List active sessions with device/IP/timestamp.
2. User selects one/more sessions.
3. Revoke tokens immediately.
4. Invalidate refresh tokens.
5. Write audit event.

7.2 Dashboard — Use Cases

UC-7.2-1 View dashboard widgets

Actors: Any staff

Preconditions: Authenticated

Main Flow:

1. Resolve user permissions and scope.
2. Query tasks grouped: Due Today, Overdue, Next 7 Days.
3. Query key dates (medicals, police checks, CO requests).
4. Build pipeline counts by stage.
5. Fetch recent activity (uploads, messages) last 7 days.
6. Render widgets; cache snapshot for 10 minutes.

UC-7.2-2 Complete/snooze task from widget

Actors: Staff

Main Flow:

1. User selects task.
2. If "Complete":
 - Check dependencies closed; if not → show override; on confirm → continue.
 - Mark status=Done; stamp completed_at; write audit.
3. If "Snooze":
 - Choose offset (+1d/+3d/next week/custom) and optional reason.
 - Update due_on; write audit.
4. Update dashboard counts in memory.

UC-7.2-3 Drill into pipeline stage

Actors: Manager/RMA

Main Flow:

1. User clicks stage bar.
2. Apply server filter (stage, user scope).
3. Open Matters list with saved view option.

7.3 Clients Module — Use Cases

UC-7.3-1 Create client (person)

Actors: Intake, RMA

Preconditions: None

Main Flow:

1. Enter demographics and contacts.
2. Optionally add identifiers (passport/TRN/HAP) → encrypt+mask.
3. Upload engagement letter; set consent flag.
4. Run duplicate check (name+DOB+email+passport hash).
5. If duplicate suggested → show merge dialog; else continue.
6. Persist Client; write audit.
7. Offer portal invite.

UC-7.3-2 Link dependant

Actors: Staff

Main Flow:

1. Search existing person or create dependant.
2. Select relationship (spouse/child/etc.).
3. Create FamilyLink.
4. Update matter (if any) with dependant visibility.

UC-7.3-3 Merge duplicates

Actors: Admin, RMA

Main Flow:

1. Select records → designate master.
2. Present field-by-field diff.
3. Choose winners per field; preview.
4. Merge; remap foreign keys; archive duplicate; write audit.

UC-7.3-4 Record conflict check

Actors: Intake/RMA

Main Flow:

1. Open conflict checklist.
2. Answer questions; attach evidence.
3. Set outcome (clear/decline/escalate).
4. Lock record; write audit.

7.4 Matters Module — Use Cases

UC-7.4-1 Create matter from template

Actors: RMA, Case Officer

Preconditions: Client exists; template exists

Main Flow:

1. Select visa subclass (e.g., 482).
2. Load template (stages, tasks, checklist).
3. Assign team (Primary Agent, Case Officer).
4. Create Matter; generate tasks/checklist with offsets.
5. Schedule alerts for key dates.
6. Write audit; redirect to Matter Overview.

UC-7.4-2 Update stage and key dates

Actors: Case Officer

Main Flow:

1. Change stage value.
2. Add/update MatterKeyDate entries.
3. Recalculate dependent task due dates.
4. Trigger notifications for imminent deadlines.
5. Write audit.

UC-7.4-3 Manage checklist & verification

Actors: Case Officer/RMA

Main Flow:

1. Open checklist.
2. For each item: mark Requested/Received/Verified/Rejected.
3. Link uploaded documents to item.
4. If Verify: check role permission → set verified_by/at; write audit.

UC-7.4-4 Assign/reassign team

Actors: Admin/RMA

Main Flow:

1. Open team panel.
2. Select user and role.
3. Apply reassignment; preserve history.

4. Notify new assignees.

7.5 Documents & ESign — Use Cases

UC-7.5-1 Upload document to checklist item

Actors: Client (portal), Staff

Main Flow:

1. Select checklist item.
2. Upload file (drag/drop or picker).
3. Run virus scan; if fail → quarantine + notify; STOP.
4. Persist Document (version+metadata); link to item.
5. Mark item=Received; write activity + audit.

UC-7.5-2 Verify document

Actors: RMA/Case Officer

Main Flow:

1. Open document preview.
2. Choose Verify or Reject (require reason).
3. Update ChecklistItem.status and verified_by/at.
4. Write audit; notify client if rejected.

UC-7.5-3 Send for esignature

Actors: Staff

Main Flow:

1. Choose template and signers.
2. Create envelope via esign API.
3. Store envelope ID + status=sent.
4. Receive webhook → update status (completed/declined/expired).
5. On completed → fetch signed PDF + certificate → store.
6. Write audit; notify stakeholders.

UC-7.5-4 Download with audit

Actors: Staff

Main Flow:

1. Authorise download by RBAC.

2. Stream file; log event with user, IP, timestamp.
3. Increment download counter.

7.6 Client Portal — Use Cases

UC-7.6-1 Client views matter status

Actors: Client

Main Flow:

1. Authenticate portal user.
2. Resolve linked matters.
3. Render stage tracker, outstanding items, key dates.

UC-7.6-2 Client uploads requested document

Actors: Client

Main Flow:

1. Select requested item.
2. Upload file; show progress.
3. On success → mark item Received; send notification.

UC-7.6-3 Secure message to agent

Actors: Client, Staff

Main Flow:

1. Compose message (optionally attach files).
2. Persist as Message(visibility=external).
3. Email notify staff; display in comms thread.

UC-7.6-4 Pay invoice via Stripe

Actors: Client, System

Main Flow:

1. Open invoice; click Pay.
2. Create Checkout session; redirect.
3. Receive webhook; update invoice Paid; generate receipt.
4. Notify finance + matter team.

7.7 Billing & Payments — Use Cases

UC-7.7-1 Create and send quote

Actors: Finance, RMA

Main Flow:

1. Add line items (fees/disbursements/tax).
2. Set terms and expiry.
3. Save status=draft → send to client → status=sent.
4. Track client Accept/Decline.

UC-7.7-2 Convert quote to invoice

Actors: Finance

Main Flow:

1. Validate quote.status=accepted.
2. Generate invoice number + due date.
3. Copy line items; status=sent.
4. Attach payment link.

UC-7.7-3 Capture payment (Stripe)

Actors: Client, System

Main Flow:

1. Client completes checkout.
2. Webhook receives payment_intent.succeeded.
3. Create Payment; set invoice.status=paid.
4. Email receipt to client; update reports cache.

UC-7.7-4 Overdue reminder

Actors: System

Main Flow:

1. Nightly job finds overdue invoices.
2. For each → send reminder (d1, d7, d14 cadence).
3. Log reminder events.

7.8 Reporting — Use Cases

UC-7.8-1 View pipeline report

Actors: Manager, Admin

Main Flow:

1. Apply filters (date/subclass/agent).
2. Aggregate matters by stage.
3. Render chart + table.
4. Allow save as view.

UC-7.8-2 Export deadlines & WIP

Actors: Staff

Main Flow:

1. Build dataset of matters with upcoming/overdue tasks.
2. Generate CSV/XLSX file.
3. Stream download; write AuditEvent(export).

UC-7.8-3 Revenue by agent

Actors: Finance, Admin

Main Flow:

1. Select period.
2. Sum paid invoices grouped by agent and visa subclass.
3. Cache result for 24h.
4. Display and allow export.

Common Exceptions & Error Codes

- **AUTH_401** Invalid credentials/OTP
- **AUTH_423** Account locked
- **DOC_415** Unsupported file type
- **DOC_450** Virus scan failed
- **PAY_402** Payment required/failed
- **RBAC_403** Insufficient permissions
